

THE COMPLIANCE MANAGEMENT GROUP JOINS THE AMAZON PACKAGING SUPPORT AND SUPPLIER NETWORK

Littleton, Mass. – January 25, 2022 – The Compliance Management Group (CMG), an ISTA- and A2LA-accredited test laboratory, has joined the Amazon Packaging Support and Supplier Network (APASS). The APASS program was developed by Amazon to support Vendors in certifying their products under Amazon’s Frustration-Free Packaging Programs guidelines.

This program includes three certification tiers:

- Tier 1 - Frustration Free Packaging (FFP),
- Tier 2 - Ships-in-Own-Container (SIOC) and
- Tier 3 - Prep-Free Packaging (PFP)

All APASS network companies have received guidance and training from Amazon on how to test, design, and supply packaging in line with meeting Amazon’s packaging certification guidelines.

CMG is pleased to now offer packaging testing services for U.S. manufacturers interested in reducing their costs, minimizing Amazon prep chargebacks, and improving overall customer experience with their products in line with Amazon’s guidance.

About CMG

CMG is an ISTA and ISO 17025 accredited test laboratory that has provided package testing services for leading manufacturers and global brands for more than 20 years. Our advanced equipment technology can perform incline impact testing and compression testing up to 45,000 pounds, among other capabilities. Our highly-trained engineers proactively solve client packaging issues thanks to more than 100 years of combined testing experience.
